

FORMAFLEX®

L' ORIGINALE

Flexible, non-stick, easy to use and wash either by hand or in the dishwasher.

The flexible non-stick baking moulds are manufactured in plain silicon, suitable to get in touch with food, as per international laws. Formaflex® can be used for the most kind of baking or freezing processes in pastry shops, restaurants, food industries etc. It is the best way to substitute multi-shaped metal trays. They are suitable for freezing or baking into static, rotor or microwave ovens and automatic lines. Formaflex® is 17,5x30 cm, as 1/3 Gastronorm size and 1/4 of Bakenorm size and therefore perfect for all professional tools in bakery, confectionery and horeca.

- *Formaflex® can be used for freezing and baking processes and can be put directly from the freezer to the oven.*
- *To use it correctly place Formaflex® on grills or perforated trays to improve the heat diffusion.*
- *Flexibility and non-stick features allow to demould products in an easy and perfect way. To get the best result it is enough to make a gentle regular torsion starting from the corner.*
- *Let cool down products before demoulding.*
- *Formaflex® should be washed after use, either by hand or in the dishwasher. Formaflex® resists to frequent washing cycles without losing its physical features.*

Offre la possibilità di eseguire tutte le preparazioni dei prodotti dolci e salati sostituendo l'utilizzo di teglie e stampi in metallo.

Suitable to bake or freeze sweet and salted products. Can be used for most baking or freezing process in the pastry shops, restaurants, food industries etc. It is the ideal to substitute multi-shaped metal trays.

Le proprietà antiaderenti permettono di sfornare il prodotto in modo perfetto.

Non-stick features allow an easy demoulding.

Resiste a temperatura da - 40°C a + 280°C

Resists temperatures from - 40°C to + 280°C
